Assistant Professor in cognitive and computational neuroscience

Departement of Psychology
Faculté des arts et des sciences

Position description

The Department of Psychology invites applications for a full-time, tenure-track position of Assistant Professor in cognitive and computational neuroscience.

The appointed candidate will reinforce and complement the departmental expertise in cognitive and computational neuroscience, and its applications in neuroimaging and biomarkers of cognition, mental health, clinical populations, etc. The Department of Psychology has 58 professors and is a leading force in cognitive and computational neuroscience, neuropsychology and mental health. It groups together several technological platforms on campus (e.g., MEG, EEG, TMS, augmented/virtual reality, motion capture, eye tracking) and maintains close links with affiliated research centers (hospitals and rehabilitation centers) within which several professors of the Department have developed research infrastructures (e.g., MRI, EEG, NIRS, polysomnography, smart apartment). The appointed candidate will also have the opportunity to develop collaborations with researchers from other departments/faculties of the University in the areas of neuroscience, mental health, data science and computer science.

The teaching that the appointed candidate will offer will be part of a state-of-the-art undergraduate training in cognitive neuroscience, the only one of its kind in French in the world, as well as training in research masters and doctoral level for which the cognitive and computational neuroscience component is in full development. These programs draw on the advanced expertise of professors in the Department of Psychology, but also on strong interdepartmental and interfaculty collaborations. The appointed candidate will also be immersed in an environment that offers two doctorates in clinical neuropsychology. These contribute to the integration of knowledge in cognitive neuroscience and neuropsychology to better understand, treat and rehabilitate health issues that affect cognition and mental health. At the heart of these programs is the University Psychology Clinic, a practical training environment for doctoral students that welcomes community users. A clinical research infrastructure is currently being developed within the Clinic to accelerate applied research in these areas.

Responsibilities

The appointed candidate will be expected to teach undergraduate and graduate courses in the Department’s various programs (ex., B.Sc. in cognitive neuroscience, M.Sc. in psychology, and cognitive and computational neuroscience option of the Ph.D. in psychology), supervise graduate students, be active in research, publishing, and the diffusion of knowledge, and contribute to the reach and activities of the Department and the University.
Requirements

- Hold a doctorate in psychology, cognitive neuroscience or a related discipline and sufficient postdoctoral experience to rapidly develop a research program that will attract competitive research funding in cognitive and computational neuroscience.
- Strong research record in the field.
- Ability to provide high quality university teaching.
- An adequate knowledge of the French written and spoken language or a strong commitment to mastering the proficiency level required, in accordance to Université de Montréal’s Language Policy. An institutional learning support program is offered to all professors wishing to learn French or improve their communication skills.

How to submit your application

The application file must consist of the following documents:

- a letter outlining your interests and career goals;
- to comply with the requirements of the Government of Canada, please include in your cover letter any of the following: "I am a citizen/permanent resident of Canada" or "I am not a citizen/permanent resident of Canada ".
- a curriculum vitae;
- copies of recent publications or research;
- a presentation of your research program (no more than three pages);
- three letters of recommendation, which must be sent directly by their author to the Department Chair.

The application and the letters of recommendation must be sent by e-mail to the Chair of the Department of Psychology no later than November 22, 2019:

Michelle McKerrall, Chair
Faculté des arts et des sciences / Departement of Psychology
Université de Montréal
Phone : 514-343-6503
Email : direction@psy.umontreal.ca

More information about the Department of psychology is available on its website at www.psy.umontreal.ca.

Université de Montréal is strongly committed to fostering diversity and inclusion. Through its Equal Access Employment Program, UdeM invites applications from women, Aboriginal people, visible and ethnic minorities, as well as persons with disabilities. We will –confidentially – adapt our recruitment mechanisms to the specific needs of people with disabilities who request it. We also welcome applications from all orientations and sexual identities. All qualified applicants are encouraged to apply; however, in accordance with Canadian immigration requirements, priority will be given to Canadians and permanent residents.

Université de Montréal’s application process allows all members of the Professor’s Assembly to review the application files submitted. If you wish to keep your application confidential until the shortlist is established, please mention it in your application.
